(PT 200*)

LINETEC PT-ON Natural Brass

This brass profile is produced with first grade raw material, guaranteeing resistance to chemical and mechanical stress and wear. It is used indoors and outdoors, particularly suitable for areas with heavy, industrial traffic as well as for elegant residential detailing. Moisture and corrosive agents may oxidize the exposed surfaces. Buffing the profile with conventional polisher will bring back its shine in no time.

LINETEC PT-IN Natural Stainless Steel AISI 304 - DIN 1.4301

This stainless steel profile ensures high resistance to most diluted chemicals found in laboratories and aggressive detergents present in food processing plants, commercial kitchens, slaughter houses, breweries, public toilets, and hospitals. Due to the steel bending process, this profile section has a slight shape variation.
